BEAR™

TRADER®

RESISTS ALL CREATURES

Designed for our unique Australian conditions, the new Bear V2 range of smoke alarms and accessories are built with new Dual-Spectrum technology inside the sensing chamber to distinguish real smoke from other particles.

Bear V2 is now more insect resistant, dust tolerant and also resists cooking vapours and construction dust compared to our first generation Bear range. This means less nuisance alarms and call backs for you the installer.

Backed by a 10 Year Warranty, Bear V2 meets new Australian Standards AS3786:2023.
