Push-button Gems

MEPBEV2

Switch Mechanism Push Button Electronic ON OFF 3 Wire Master Suits MEPB Range Amber and Blue LED with Gloss White and Black Buttons

When you need top shelf switching, Trader has you sorted with Meerkat push-button electronic switch mechanisms.

Our MEPBEV2 (Version 2) is an ON/OFF switch offering soft touch operation with a choice of built-in programmable Blue or Amber indicator lights.

Tuned to work smoothly with leading brands of downlights sold by electrical wholesalers, for optimum results pair with Trader Scorpion downlights. If multi-way switching is required, use in conjunction with a Meerkat MEPBEMWV2 slave unit.

MEERKAT™

MEPBMWV2

Slave Mechanism Push Button Electronic Multiway Remote ON OFF DIM Suits DIMPBDV2 MEPBEV2 Range Amber and Blue LED with Gloss White and Black Buttons

Create multi-way dimming and switching with our Dimpala push-button dimmer and Meerkat push-button switches with our MEPBMWV2 (Version 2) slave mechanism.

Designed exclusively for these products, the MEPBMWV2 is NOT FOR STANDALONE MAINS SWITCHING. Provided that the total length of the remote connection does not exceed 50 metres, the slave mech provides full functionality to the master module (push-button dimmer or switch) that it is connected to.

Offering soft touch operation, MEPBMWV2 also offers a choice of built-in programmable Blue or Amber indicator lights.
