

# Electrical Solutions Metro & Regional Airports

Maximise the safety of staff and visitors in airports with electrical solutions from Trader, Australia's fastest growing brand of switches, sockets and wiring accessories.

We are local, Australian owned and represented in every state and territory.

## Always charged

In waiting areas and during lengthy periods between flights, give visitors the opportunity to charge their phones with our Puma and Cougar range of USB chargers.

Available with power points as well as standalone USB.

## Data from a different angle

We have all the data accessories needed for fast and efficient comms including angled data plates that are designed for tight workspaces and reducing cable damage.

## Networking the room

We have a range of TV mounting accessories to ensure a professional installation including, integrated entertainment plates, recessed wall boxes, TV brackets, HDMI leads and adaptors.

## Nightlights

Perfect for hallways and utility rooms, the Meerkat Nightlight Mech light offers safe and cost effective convenience for visitors.

Scorpion Nightlight is rechargeable and can be easily moved to where it is most needed.

## Air refreshed

Keep bathroom areas odourless with our Falcon range of exhaust fans.

Our ducted fans are designed in a choice of square or round fascia and will match any contemporary bathroom design.

## Built to last

Airport hangars and warehouses can be a tough environment for electrical switchgear.

Our Buffalo industrial switchgear is made from heavy duty polycarbonate, designed to withstand impacts.

Should switch and outlet fascia get damaged, enclosure boxes, flap assemblies are available separately.

## Energy smart outside

Our Owl Outdoor sensors offer a IP66 weather protection rating and are designed to withstand the elements.

The sensor lens covers a wide 110 degrees detection up to 18 metres.

## Energy smart

Powermesh smart switches and power points provide timers and sunset/sunrise schedules for lighting and appliances.

Power is never left on indefinitely saving energy and reducing power bills. Power points are even lockable to prevent unauthorised use.
