

Electrical Solutions for crash repairers & automotive workshops

Maximise the safety of everyone in the workshop with electrical solutions from Trader, Australia's fastest growing brand of switches, sockets and wiring accessories.

We are local, Australian owned and represented in every state and territory.

Electrical protection

Protect your workers and expensive air compressors and pneumatic equipment with our Buffalo switched socket combinations. Features our Wolverine RCD circuit protection inside the enclosure. Chemical resistant options also available.

Long life performance

Using petroleum based chemicals in washdown areas? Are exhaust fumes prevalent? Switch to the Buffalo chemical resistant orange range of industrial switchgear, designed to meet the needs of harsh automotive workshop environments where intensive cleaning with these chemicals and exposure would otherwise damage standard switchgear.

Power from above

Nowhere to run cable for your electric buffing and polishing equipment? Hang it instead with a suspension socket. Available in 10A & 15A.

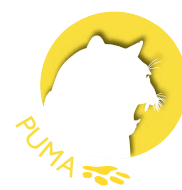

Charging up

Do you have a customer waiting area? Offer customers the convenience of phone charging with our Puma Type A&C USB chargers.

Front of house

Make sure your office has all the power points, USB chargers and data you need to run an efficient workplace. If space is a premium we have the solutions to get the most out of every power point.
