Available Now through your Electrical Wholesaler

Electronic Switches available.

See separate flyer for more information.

# CLOUDED LEOPARD

The Clouded Leopard has arrived from Trader, our Slim range of switches and sockets is ready for use by Australian Electrical Contractors.

## Exciting Features of the Clouded Leopard Range

- Fits standard mounting accessories as screw mounting area is not recessed, and therefore quicker and easier compared to other Slim products on the market, which in turn saves time and achieves the slim look for the consumer.
- The Clouded Leopard has “Green” indicators and features the smooth lines of the ‘Cat’s Eye Dolly’.
- For Power Points, installers can see quality working parts in the translucent green material used on the base moulding.
- Terminals are large and in line for ease of installation.
- Switch dolly’s are spaced apart like a conventional powerpoint, whereas other Slim products on the market have centralised them.
- All Trader switches and sockets are made from 100% virgin Polycarbonate.
- The leading switch mechanism on the market - “The Claw Mech” 16AX/20A - Ideal for all fluoro applications and means you don’t have to carry different rated switches for different applications.
- To achieve the Slim look and to fit with standard mounting accessories we have introduced “Cat Flaps”. The Contractor is required to push these in place before attaching the cover plate (See Instructions in box for detail).
- Products are fully certified and compliant with Australian standards.
- Robust terminals with plenty of wiring space.
- Switch plates can accommodate other clip in Trader modules or equivalents in the market.
- Straight top edge for easy alignment.
- Colours available Matt White (MW) and Matt Black (MBK).

# CLOUDED LEOPARD

The Clouded Leopard has arrived from Trader, our Slim range of electronic switches and sockets is ready for use by Australian Electrical Contractors.

## Exciting Features of the Clouded Leopard Range

- The One and Two Gang assemblies of Clouded Leopard are available prepopulated with MEPBE electronic push button switches and fitted with the special MEBUCMW flat buttons.
- These assemblies provide the simple convenience of the switch for use in many common applications.
- Where there are other applications for multiway switching the MEPBMW in matt white finish can be combined with the CLSWPV1GMW single gang plate - through to the 6 gang plate.  
Can be installed along with the Matt White MEBUCMW button or other MEPBE.
- Other assemblies will likely require multi way switch combinations so must be purchased as separate components for switches, plates and buttons.
- The plates can also be populated with the DIMPBD where dimming is needed in the same technique as the MEPBE.
- These assemblies can also be produced in the matt black finish.

**AUTO-SWITCH POWERPOINT  
USB OPTIONS AVAILABLE NOW!**

- Straight top edge for easy alignment.
- Fits standard mounting accessories as screw mounting area is not recessed, and therefore quicker and easier compared to other Slim products on the market, which in turn saves time and achieves the slim look for the consumer.
- For Power Points, installers can use traditional 250V mechanical designs where you can see quality working parts in the translucent green material.
- Terminals are large and in line for ease of installation.
- To achieve the Slim look and to fit with standard mounting accessories we have introduced "Cat Flaps". The Contractor is required to push these in place before attaching the cover plate (See Instructions in box for detail).

- Products are fully certified and compliant with Australian standards.
- Robust terminals with plenty of wiring space.
- Colours available Matt White (MW) and Matt Black (MBK).
