

CHEMICALLY CLEAN READY

Our Hippo range of large isolators are now available in a specially produced chemical resistant white version, designed for acidic applications. Ideal for food prep areas and commercial kitchens where acid-based cleaners eg. Hydrochloric, Nitric and Sulphuric or diluted detergents are used.

The isolators have undergone lengthy testing in accordance with ISO 22088-1 and ISO 22088-3 for determination of environmental stress cracking. Offering the same performance as our standard Hippo isolators, the range is IP66 rated, UV stabilised and features based mounted switch modules and twin 25mm threaded entries.
