

If you can install a Power Point,
you can install Powermesh.

So easy to install

1

Installation

Simply replace your existing power points or install as new, just like normal. No extra wiring or hub is needed to use them once installed.

2

Pairing and Setup

Download Zimi and hold next to the device, just follow the steps on-screen. Choose a room, name each socket, it's that easy.

3

Zimi Cloud Connect

Hold Zimi next to the device and follow the steps on-screen to connect your Powermesh network to the internet.

4

mesh & go®

Finish your installation and store the setup on the MESH and GO card. Your client can take ownership simply by scanning the card or with email.

Watch the installation video's.

Double Power Point

Dimmable Light Switch
