1. Introduction

At Trader, we provide high-quality electrical products and actively working to minimize our environmental impact. We understand that our operations including the supply, and servicing of electrical products can affect the environment, and we are committed to reducing these impacts through sustainable practices and ongoing improvement.

2. Our Commitment

We are dedicated to:

- Complying with all relevant environmental legislation, regulations, and industry standards.
- Promoting energy-efficient electrical systems and solutions.
- Reducing waste, especially electrical and electronic materials, through recycling and responsible disposal.
- Preventing pollution and managing environmental risks on all project sites.
- Using eco-friendly and sustainable products and materials where feasible.

3. Objectives

To fulfill our environmental commitments, Trader GSM Electrical aims to:

- Lower energy and fuel consumption in our operations.
- Support clients in choosing efficient, low-impact technologies (e.g. LED lighting, smart controls).
- Recycle materials such as wiring, and packaging responsibly.
- Maintain vehicles and tools for peak efficiency and reduced emissions.

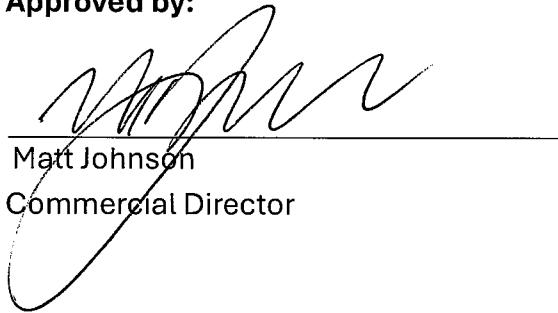

4. Implementation

This policy is integrated into our business operations through project planning, procurement practices, and management procedures. Environmental considerations are part of our risk assessments, and we assign clear responsibilities to ensure policy compliance. Trader seeks to partner with offshore supplier partners that engage supply chain specialists in data, insights and professional services to empower supply chain sustainability. These specialists employ a blend of scalable and site-specific capabilities for efficient, in-depth analysis on social and environmental practices.

5. Communication

This Environmental Policy is communicated to all employees and suppliers. It is reviewed regularly and available on request or on our company website to ensure transparency.
